Student alerts

Temporary removal of access to your NMIT network drives - Wednesday 17 May

As you may be aware, the world has recently been exposed to a significant ransomware attack. We here at NMIT take IT security very seriously and do everything we can to ensure our systems and your files are protected and safe.

To deliver on this we are needing to undertake some work on the local network filestore drives (H: home & L: library) which you may be using to store documents.

These will be unavailable for approximately **30 - 45 mins tomorrow (Wednesday 17 May 2017) between 12:00 and & 1:00 pm**. Your access to Moodle or Office 365 and OneDrive etc. remains unaffected during this time.
